### What people have said about our support:

*'Absolutely crucial in keeping updated'*

*'Without this support I would not be on top of the latest guidance, regulations or resources'*

*'It can be a lonely job in school so very useful to access support, meet others doing the same job and share ideas'*

## Training and Development Support to Schools and Colleges from C&K Careers

### Designed and Delivered to Match Your Needs

Up to 1 day FREE consultancy support to schools and colleges from C&K Careers if your institution is part of the collaborative agreement.

Research has identified that Careers Education Information, Advice and Guidance is vital to creating a successful future for the UK. 4 out of 5 schools nationally were not meeting statutory requirements. We can help you support your learners to make well informed and realistic decisions about their future choices.

For example we provide indepth bespoke support to help you audit and develop your careers provision and move towards assessment for our local C&K Quality Standard.

28 local schools/colleges hold this award which provides the benchmark for CEIAG across all year groups. It is one of only 6 local awards to meet rigorous national validation criteria. The award demonstrates to Ofsted, parents and students the quality of your provision.

Assessment (worth over £1000) is free to schools/colleges who are part of the local agreement.

Other examples of consultancy available include:

- support for new careers coordinators/managers
- using the ACEG framework to plan a careers programme
- How to monitor and evaluate your careers provision (identified as weak nationally)
- Labour Market Information
- Apprenticeships
- Post 16 choices and progression routes.
- Information/websites to support careers provision

From September 2013 Ofsted will focus more on careers provision looking at how well leaders and managers ensure timely independent information, advice and guidance.

So why not access our help to audit and improve your provision?
