

GREEN HIGHER EDUCATION

CALDERDALE

Doing a higher education (HE) course at a college or university could help you with the skills and knowledge you need to get a green job. This leaflet will give you ideas of the types of green courses there are. Usually you need level 3 qualifications, such as A levels, a BTEC National, a T level or an access to HE diploma to study at this level.

- Global Sustainability
- Sustainable Fashion
- Sustainable Futures
- Sustainable Luxury
- Sustainable Product Design
- Sustainable Technologies
- Sustainable Transport
- Urban Planning

MORE INFORMATION

Usually, it takes at least three years to study for a degree, so it is important to think carefully about what you are going to study and where. Look at www.ucas.com and check out individual university and college websites for the latest information about course content and entry requirements. For information about green careers see www.greencareershub.com

It is important to visit a university or college to find out if it's somewhere you'd like to study. See www.ucas.com/undergraduate/what-and-where-study/university-open-days for more information.
